SUMMARY

My name is Felix Wahyu Sejati, A Bachelor's degree in Information Systems from STIKOM Yos Sudarso Purwokerto, specializing in website development. I have a strong passion for continuously learning new things, particularly in the field of software development. I not only build systems that function well and meet needs, but also strive to provide solutions that effectively solve user and business problems, are easy to maintain, and are ready to evolve with changing needs. I'm committed to staying up-to-date on technological developments. I'm currently exploring React, TypeScript, Microservices Architecture, and utilizing Artificial Intelligence (AI) to improve productivity and efficiency in software development.

Fun fact: I enjoy strategy and puzzle games because they encourage logical thinking, problem-solving, and decision-making. I also apply this mindset to software development, from analyzing problems to designing appropriate solutions.

PROFESSIONAL EXPERIENCE

Project Leader Data Analyst and Software Engineering, PT

Aug 2023 - Jan 2024

Revou

- Create a clear project schedule timeline so that it is neatly arranged and on target.
- Processed and analyzed real-world hotel demand data using SQL and Python.
- Produced an analytical dashboard with interactive graphs for easy-to-read information.
- Designed and built a website for an F&B business to manage food ordering using Agile methods.
- Developed a website for an F&B business that increased management accuracy data and food ordering efficiency by up to 15%.

Thesis: Designing and Building a Website-Based Sales System at

Mar 2025 - Okt 2025

Mruyung Bakery

- The problem with the store not having a website is that branding is still done through social media, making it less effective and professional.
- Manual reporting management is time-consuming and risks data loss.
- The solution is to build a website-based sales information system using a prototype method.
- Improve branding to be more professional, with high SEO and up to 20% operational efficiency in reporting.

IT Project, PT Fulki Hasya

Dec 2025 - Jan 2026

- Problems with websites and products not being indexed in Google search engines.
- Problems with slow website loading, which leads to customers leaving due to long wait times.
- Developing websites with higher SEO optimization to rank number one in Google search engines.
- Optimizing code and oversized files to increase website speed so they don't lag.
- Increasing product orders through the website by up to 30%.
